Product Profile

Name: **UltraSorb 20 – Bio-Active Adsorbent**

Description: A Complimentary Feeding Stuff for use in animal nutrition. A source of biologically active components designed to counteract the effects of a wide range of pre-formed fungal secondary metabolites and toxins present in feedstuffs by binding them into inactive or unavailable forms.

Function: Helps to manage problems associated with fungal metabolites that can impact animal health, fertility and production

Application: Dairy & Beef: Administer 20g per head per day as a top dress to feed or incorporate into total mixed rations (TMR).
Calves, Sheep & Goats: Administer 6 – 10g per head per day as a top dress to feed or incorporate into total mixed rations (TMR).
May also be incorporated into complete feed or mineral mixes formulated to deliver 6 – 40g of per head per day. Consult your nutritionist for advice.
Horses: Add to rations at 40g per head per day.
Swine: Incorporate into complete feeds at the rate of 2 – 4 kg per tonne of feed.
Poultry: Incorporate into complete feeds at the rate of 2 – 4 kg per tonne of feed.

Ingredients: By descending order of inclusion:
Over 40% Sodium aluminosilicate
25 - 40% Calcium aluminosilicate
10 - 25% Dried yeast culture extract.
Under 10% Dried molasses, dried yeast culture, vitamin A (64500 IU/kg), vitamin E (95 IU/kg), manganese sulphate, vegetable oil.

Storage: Store in a cool dry area in original sealed packaging. Keep bag closed when not in use.

Shelf Life: Use within two years of date of manufacture.

Packaging: Available in units of: 25 kg bags
12.5kg buckets

Typical Analysis:

Microbial: N/A

Nutritional: (% D.M.)

Moisture	7.4
Crude fibre	0.7
Crude protein	4.4
Oil	1.4
Ash	83.5

Physical Characteristics:

Colour: Brown and Grey Particles
Odour: Mild Yeast
Texture: Granular Powder
Bulk Densities: 0.82 – 0.88 g/cc

Manufactured By: Micron Bio-Systems Ltd, BFF Business Park, Bath Road, Bridgwater TA6 4NZ
Approved Facility (EC) 183/2005 α GB 280/0022
FEMAS Certificate No. 44567
